

JOHNEX explosives

MEGADRIVE® Water Resistant Cartridged Emulsion Explosive

RECOMMENDATION FOR USE

1. When using a detonator, start by inserting the plastic detonator skewer (which is supplied in each box) into the cartridge end and along the central axis of the charge.

3. Secure the detonator lead to the cartridge using one or more half-hitch knots or electrical tape.

2. Then insert the detonator into the cavity created by the plastic skewer.

4. When using detonator cord, thread the cord carefully through at least two cross-cutting holes made with the skewer, attach the cord to the cartridge with electrical tape (starting and finishing at the top) before securing the cord to itself (by knot or tape).
